INDEX TO THE TRANSACTIONS OF THE INSTITUTION OF CHEMICAL ENGINEERS

VOLUME 60 1982

THE INSTITUTION OF CHEMICAL ENGINEERS
George E. Davis Building
165–171 Railway Terrace Rugby CV21 3HQ

AUTHOR INDEX

Page

Abbas, S. P., Srinivasan, P., Ghosh, S., Devotta, S., and Watson, F. A., A correlation between decomposition of fluorocarbons and viscosity changes of lubricants when exposed to elevated temperatures . . 380
Abbot, C. J., Hills, J. H., and Westall, L. J., A simple apparatus for the measurement of mass transfer from gas bubbles to liquids . . 369
Aird, R. J., Reliability assessment of safety/relief valves . . 314
Aly, G., Dynamic behaviour of mixer settlers—applicability of the orthogonal collocation method . . 240
Andow, P. K., Martin-Solis, G. A., and Lees, F. P., Fault tree synthesis for design and real time applications . . 14
Andrew, S. P. S., Gas–liquid mass transfer in microbiological reactors . . 3
Anwar, M. M., Bright, A., Das, T. K., and Wilkinson, W. L., Laminar liquid jets in immiscible liquid systems . . 306
Ayers, W. H., Boysan, F., and Swithenbank, J., A fundamental mathematical modelling approach to cyclone design . . 222

Bailes, P. J., and Larkai, S. K. L., Liquid phase separation in pulsed DC fields . . 115
Bayvel, L. P., The effect of the polydispersity of drops on the efficiency of a venturi scrubber . . 31
Bourne, J. R., and Gros, H., The influence of heat effects on the modelling and performance of staged gas–liquid reactors . . 97
Boysan, F., Ayers, W. H., and Swithenbank, J., A fundamental mathematical modelling approach to cyclone design . . 222
Bright, A., Anwar, M. M., Das, T. K., and Wilkinson, W. L., Laminar liquid jets in immiscible liquid systems . . 306
Bull, M. A., Sterritt, R. M., and Lester, J. N., The effect of organic loading on the performance of anaerobic fluidised beds treating high strength wastewaters . . 373
Burgess, J. M., Fane, A. G., and Fell, C. J. D., Application of an electroresistivity probe technique to a two-dimensional fluidised bed . . 249

Charpentier, J. C., What's new in absorption with chemical reaction . . 131
Chiwetelu, C., Hornof, V., and Neale, G. H., Enhanced oil recovery using lignosulphonate/petroleum sulphonate mixtures 177
Cross, A. D., Jones, P. L., and Lawton, J., Simultaneous energy and mass transfer in radiofrequency fields
Part I—Validation of the theoretical method . . 67
Part II—Characteristics of radiofrequency dryers . . 75

Das, T. K., Anwar, M. M., Bright, A., and Wilkinson, W. L., Laminar liquid jets in immiscible liquid systems . . 306
Davidson, J. F., and Ross, I. B., The combustion of carbon particles in a fluidised bed . . 108
Davidson, J. F., and Lewis, D. A., Bubble splitting in shear flow 283
Davis, G. B., and Hill, J. M., Some theoretical aspects of oil recovery from fractured reservoirs . . 352
de Jong, E. J., Scrutton, A., and Grootscholten, P. A. M., Effect of impeller draft tube clearance on the crystallisation kinetics of sodium chloride . . 345
Devotta, S., Srinivasan, P., Abbas, S. P., Ghosh, S., and Watson, F. A., A correlation between decomposition of fluorocarbons and viscosity changes of lubricants when exposed to elevated temperatures . . 380
Dodd, R., Temperature efficiency of heat exchangers with one shell pass and even number of tube passes . . 364

Eastop, T. D., and Turner, J. R., Air flow around three cylinders at various pitch-to-diameter ratios for both a longitudinal and a transverse arrangement . . 359
Edwards, D., Lewis, D. A., Field, R. W., and Xavier, A. M., Heat transfer in bubble columns . . 40

Fane, A. G., Burgess, J. M., and Fell, C. J. D., Application of an electroresistivity probe technique to a two-dimensional fluidised bed . . 249
Farooqi, S. I., and Richardson, J. F., Horizontal flow of air and liquid (Newtonian and non-Newtonian) in a smooth pipe
Part I—A correlation for average liquid holdup . . 292
Part II—Average pressure drop . . 323

Fell, C. J. D., Burgess, J. M., and Fane, A. G., Application of an electroresistivity probe technique to a two-dimensional fluidised bed . . 249
Field, R. W., Lewis, D. A., Xavier, A. M., and Edwards, D., Heat transfer in bubble columns . . 40
Fletcher, D. F., Maskell, S. J., and Patrick, M. A., Theoretical investigation of the Chilton–Colburn analogy . . 122
Franklin, N. L., and Wilkinson, M. B., Reversibility in the separation of multicomponent mixtures . . 276

Garside, J., and Tavare, N. S., Estimation of crystal growth and dispersion parameters using pulse response techniques in batch crystallisers . . 334
Ghosh, S., Srinivasan, P., Abbas, S. P., Devotta, S., and Watson, F. A., A correlation between decomposition of fluorocarbons and viscosity changes of lubricants when exposed to elevated temperatures . . 380
Greaves, M., and Harvey, P. S., Turbulent flow in an agitated vessel
Part I—A predictive model . . 195
Part II—Numerical solution and model predictions . . 201
Grootscholten, P. A. M., Scrutton, A., and de Jong, E. J., Effect of impeller draft tube clearance on the crystallisation kinetics of sodium chloride . . 345
Gros, H., and Bourne, J. R., The influence of heat effects on the modelling and performance of staged gas–liquid reactors . . 97

Harrison, D., and King, D. F., The dense phase of a fluidised bed at elevated pressures . . 26
Hartland, S., and Kumar, A., Prediction of drop size produced by a multiorifice distributor . . 35
Harvey, P. S., and Greaves, M., Turbulent flow in an agitated vessel
Part I—A predictive model . . 195
Part II—Numerical solution and model predictions . . 201
Heggs, P. J., Report of Ninth Annual Research Meeting . . 253
Hermia, J., Constant pressure blocking filtration laws—Application to power-law non-Newtonian fluids. . . 183
Hill, J. M., and Davis, G. B., Some theoretical aspects of oil recovery from fractured reservoirs . . 352
Hills, J. H., Abbott, C. J., and Westall, L. J., A simple apparatus for the measurement of mass transfer from gas bubbles to liquids . . 369
Hoare, M., Protein precipitation and precipitate ageing
Part I—Salting out and ageing of casein precipitates . . 79
Part II—Growth of protein precipitates during hindered settling or exposure to shear . . 157
Hornof, V., Chiwetelu, C., and Neale, G. H., Enhanced oil recovery using lignosulphonate/petroleum sulphonate mixtures 177
Howley, P., Wall, T. F., and Subramanian, V., An experimental study of the geometry, mixing and entrainment of particle-laden jets up to ten diameters from the nozzle . . 231

Jones, P. L., Cross, A. D., and Lawton, J., Simultaneous energy and mass transfer in radiofrequency fields
Part I—Validation of the theoretical model. . . 67
Part II—Characteristics of radiofrequency dryers . . 75

King, D. F., and Harrison, D., The dense phase of a fluidised bed at elevated pressures . . 26
Kloos, D., and Mu, J., A bench-scale continuous-flow rotary reactor for studies of high temperature reactions . . 377
Kolaczkowski, J. A., and Yue, P. L., Multiorifice distributor design for fluidised beds . . 164
Kumar, A., and Hartland, S., Prediction of drop size produced by a multiorifice distributor . . 35

Lane, A. G. C., and Rice, P., An investigation of liquid jet mixing employing an inclined side entry jet . . 171
Lane, A. G. C., and Rice, P., The flow characteristics of a submerged bounded jet in a closed system . . 245
Larkai, S. K. L., and Bailes, P. J., Liquid phase separation in pulsed DC fields . . 115

Lawton, J., Cross, A. D., and Jones, P. L., Simultaneous energy and mass transfer in radiofrequency fields
Part I—Validation of the theoretical model. 67
Part II—Characteristics of radiofrequency dryers 75
Lees, F. P., Martin-Solis, G. A., and Andow, P. K., Fault tree synthesis for design and real time applications 14
Lees, F. P., The hazard warning structure of major hazards . . 211

TITLE INDEX

Page

Air flow around three cylinders at various pitch-to-diameter ratios for both a longitudinal and a transverse arrangement, by T. D. Eastop and J. R. Turner 359
Annual Research Meeting Report: Computers in Chemical Engineering, by P. J. Heggs 253
Application of an electroresistivity probe technique to a two-dimensional fluidised bed, by J. M. Burgess, A. G. Fane and C. J. D. Fell 249

Bench-scale continuous-flow rotary reactor for studies of high temperature reactions, by J. Mu and D. Kloos. 377
Bubble splitting in shear flow, by D. A. Lewis and J. F. Davidson 283

Combustion of carbon particles in a fluidised bed, by I. B. Ross and J. F. Davidson 108
Constant pressure blocking filtration laws—application to power-law non-Newtonian fluids, by J. Hermia 183
Correlation between decomposition of fluorocarbons and viscosity changes of lubricants when exposed to elevated temperatures, by P. Srinivasan, S. P. Abbas, S. Ghosh, S. Devotta and F. A. Watson 380

Dense phase of a fluidised bed at elevated pressures, by D. F. King and D. Harrison 26
Dynamic behaviour of mixer settlers—applicability of the orthogonal collocation method, by G. Aly 240

Effect of impeller draft tube clearance on the crystallisation kinetics of sodium chloride, by A. Scrutton, P. A. Grootscholten, and E. J. de Jong 345
Effect of organic loading on the performance of anaerobic fluidised beds treating high strength wastewaters, by M. A. Bull, R. M. Sterritt and J. N. Lester 373
Effect of the polydispersity of drops on the efficiency of a Venturi scrubber, by L. P. Bayvel 31
Electrodialysis at high current density using a laboratory stack, by A. J. Makai and J. C. R. Turner 88
Enhanced oil recovery using lignosulphonate/petroleum sulphonate mixtures, by C. Chiwetelu, V. Hornof and G. H. Neale 177
Estimation of crystal growth and dispersion parameters using pulse response techniques in batch crystallisers, by N. S. Tavare and J. Garside 334
Experimental study of the geometry, mixing and entrainment of particle-laden jets up to ten diameters from the nozzle, by T. F. Wall, V. Subramanian and P. Howley 231

Fault tree synthesis for design and real time applications, by G. A. Martin-Solis, P. K. Andow and F. P. Lees 14
Flow characteristics of a submerged bounded jet in a closed system, by A. G. C. Lane and P. Rice 245
Fundamental mathematical modelling approach to cyclone design, by F. Boysan, W. H. Ayers and J. Swithenbank .. 222

Gas–liquid mass transfer in microbiological reactors, by S. P. S. Andrew 3

Hazard warning structure of major hazards, by F. P. Lees .. 211
Heat transfer in bubble columns, by D. A. Lewis, R. W. Field, A. M. Xavier and D. Edwards 40

Page

Horizontal flow of air and liquid (Newtonian and non-Newtonian) in a smooth pipe, by S. I. Farooqi and J. F. Richardson
Part I—A correlation for average liquid holdup 292
Part II—Average pressure drop 323

Influence of heat effects on the modelling and performance of staged gas–liquid reactors, by J. R. Bourne and H. Gros .. 97
Investigation of liquid jet mixing employing an inclined side entry jet, by A. G. C. Lane and P. Rice 171

Laminar liquid jets in immiscible liquid systems, by M. M. Anwar, A. Bright, T. K. Das and W. L. Wilkinson 306
Liquid phase separation in pulsed DC fields, by P. J. Bailes and S. K. L. Larkai 115

Multiorifice distributor design for fluidised beds, by P. L. Yue and J. A. Kolaczkowski 164

Prediction of drop size produced by a multiorifice distributor, by A. Kumar and S. Hartland 35
Protein precipitation and precipitate ageing, by M. Hoare
Part I—Salting-out and ageing of casein precipitates .. 79
Part II—Growth of protein precipitates during hindered settling or exposure to shear 157

Relative sizes of fixed bed and continuous counter-current flow ion exchange equipment, by M. J. Slater 54
Reliability assessment of safety/relief valves, by R. J. Aird .. 314
Residence time distribution for laminar flow of non-Newtonian fluid in a straight circular tube, by J. Sawinsky and B. Simandi 188
Reversibility in the separation of multicomponent mixtures, by N. L. Franklin and M. B. Wilkinson 276

Simple apparatus for the measurement of mass transfer from gas bubbles to liquids, by J. H. Hills, C. J. Abbott and L. J. Westall 369
Simultaneous energy and mass transfer in radiofrequency fields, by A. D. Cross, P. L. Jones and J. Lawton
Part I—Validation of the theoretical model. 67
Part II—Characteristics of radiofrequency dryers 75
Stochastic modelling of dispersion formation in agitated liquid–liquid systems, by V. Rod and T. Misek 48

Temperature efficiency of heat exchangers with one shell pass and even number of tube passes, by R. Dodd 364
Theoretical aspects of oil recovery from fractured reservoirs, by G. B. Davis and J. M. Hill 352
Theoretical investigation of the Chilton–Colburn analogy, by D. F. Fletcher, S. J. Maskell and M. A. Patrick. 122
Theoretical prediction of stress distributions in hoppers, by R. M. Nedderman 259
Turbulent flow in an agitated vessel, by P. S. Harvey and M. Greaves
Part I—A predictive model 195
Part II—Numerical solution and model predictions .. 201

What's new in absorption with chemical reaction?, by J. C. Charpentier 131
